

CAPABILITY STATEMENT

ConnexiCore™ is an on-demand nationwide UAV Drone Solutions Provider specializing in drone data collection, image and video analysis, surveying, and mapping services. ConnexiCore creates value by delivering data efficiently and effectively through our secure cloud-based content management platform called ConnexiCore Cloud making our clients mission, data capture, analysis, and actionable tasks extremely simple. Our core values, background and experience have been built on delivering the ultimate client experience across the telecommunications, IT, and cloud industry for over 20 years.

We are positioned to effectively serve:

- Architectural Engineering and Construction
- Energy | Utilities | Telecommunication
- Commercial & Residential Real Estate and Development
- Public Safety and Security
- Industrial Inspection and Insurance
- Agriculture | Farming | Turf

ConnexiCore's success is reinforced by the desire to add sustainable value through UAV Drone innovation to improve enterprise work-flow and business process.

Telecommunications Services:

- Vegetation Height Surveys
- 3D Antenna Modeling
- Up-to-date Asset Audits
- Emergency Response Inspections

Architectural Engineering & Construction:

- Geo-referenced Orthomosaics
- Routine Progress Monitoring
- CAD Drawing Overlays
- As-built 3D Modeling

COMPANY DATA

- (FAA) Part 107 Licensed
- (FAA) Registered
- **Verify Insurance#**
VLY-F3WSVJGAS
- **EIN#** 82-2668270
- **SMALL BUSINESS**
- **VETERAN OWNED**
- **CAGE#** 834Q4
- **DUNS#** 080868621
- **NAICS :**

Power and Utilities:

- Encroaching Vegetation Inspections
- Thermal Imaging and Scanning
- Utility Pole Inspections and Audits
- Disaster Evaluation Response

Insurance Inspection:

- Aerial Damage Assessment
- Accident Recreation
- Disaster Response Imaging
- Non-intrusive Inspections

Infrastructure:

- Bridge, Dam, and Road Inspections
- Measure Cut/Fill Volumes
- As-built 3D Modeling
- Design Drawing Overlay

Public Safety & Security:

- Emergency Response and Security
- On-Demand Monitoring
- Facility Situational Awareness
- Live Video Streaming via Interoperable Response and Preparedness (IRAPP) Network for triage
- Perimeter Patrol
- Routine Surveillance
- Risk Tracking & Monitoring
- Threat Assessment
- Facial Biometric Recognition

BUSINESS PROCESS IMPROVEMENT CONSULTING & TRAINING:

ConnexiCore is dedicated to helping enterprise organizations enhance the effectiveness and accountability of their technology programs. Our analytic methods help organizations pinpoint customer needs clearly and target resources efficiently. Our business process strategies foster productive interaction within and across organizations.

ConnexiCore brings special talents to assist businesses (large and small) in adopting new and emerging technologies. Our services relegate processes for selecting and incorporating technologies into program operations – processes that set the foundation for better decision-making. ConnexiCore produces continuing results through practical solutions that account for a client's long-term objectives.
